Forecast for Wednesday 06 Sep 2023

Weather: Patchy dense fog in valleys first thing, this clearing quickly into the morning, then dry and mostly sunny but some high cloud at times. Into the evening and overnight an increasing chance of showers moving northwards over the range, rain will be fairly isolated but some frequent flashes of lightning possible towards midnight in particular– low confidence at this stage.

Chance of cloud-free hill tops above 600m: 95% or more.

Low cloud and visibility: Patchy fog in valleys first thing will give some locally very poor visibility to start. Otherwise generally good visibilities though once again fairly hazy.
